About Me

Data-driven professional with experience in SQL, Power BI, and product analytics, combining technical and business understanding to deliver actionable insights. Skilled in analyzing user behavior, building dashboards, and improving decision-making through data. Experienced in working with CRM tools and cross-functional teams to drive data-backed product and business improvements.

Experience

Product Manager + Web Developer Intern, Pulpit Mobility

Gandhinagar
December 2025
– Present

- Analyzed **100+ weekly user interactions** using Zoho SalesIQ to identify drop-off points and improve lead capture across **3 website sections**.
- Built **3+ CRM-integrated lead capture forms**, automating inquiry tracking and reducing manual data entry by **50%+**.
- Conducted user-behavior analysis using Zoho PageSense, including heatmaps, click tracking, and A/B tests to identify **5+ usability issues** and drive data-informed navigation improvements.
- Worked with a team of **4–6 engineers** during sprint cycles to prioritize data-driven feature improvements.
- Enhanced React-based UI components, improving interface responsiveness and user interaction efficiency across key product pages.

Event Operations & Data Analysis Intern, Medigence Solution

Ahmedabad
June – July 2025

- Managed operational data for a corporate event with **800+ participants**, tracking completion metrics and workflow timelines across **5+ vendor teams**.
- Evaluated post-event engagement data using Excel, including Pivot Tables and trend analysis, to identify participation patterns and generate **3 actionable operational improvements**.
- Coordinated reporting and operational updates across **5+ cross-functional teams**, ensuring consistent data tracking throughout the event lifecycle.

Junior PHP Developer Intern, Gylis Software Solution

Ahmedabad
December 2022
– March 2023

- Optimized SQL queries for backend data retrieval, improving database performance across **4+ core application modules**.
- Collaborated with **4+ developers** to translate business requirements into structured backend features and database logic.
- Produced technical documentation and debugging reports that improved development workflow clarity and reduced issue-resolution time.

Projects

E-Commerce Sales & Customer Analytics Dashboard

Python, Pandas,
NumPy, SQL,
Power BI

- Examined **10,000+ e-commerce transactions** across **4 product categories** and **4 regions** to identify revenue trends and top-performing SKUs.
- Performed end-to-end data cleaning and transformation on **15+ features** using Python and SQL, handling missing values, outliers, and inconsistencies.
- Conducted exploratory data analysis (EDA) to identify high-discount, low-profit segments causing an estimated **18% revenue leakage**.
- Designed an interactive Power BI dashboard with **6+ visualizations**, including KPI cards, regional heatmaps, and time-series trends for sales monitoring.
- Generated insights highlighting high-revenue regions and inefficient discount strategies to support data-driven pricing decisions.

Customer Churn Analysis & Prediction

Python, Pandas,

- Investigated **7,000+ telecom customer records** with **20+ features** to identify key churn drivers such as contract type, tenure, and monthly charges. Scikit-Learn, Power BI
- Performed feature engineering and preprocessing, including encoding, scaling, and imputation, to improve model input quality and reduce dataset noise.
- Developed a Logistic Regression model achieving **80–85% accuracy**, evaluated using confusion matrix, precision, recall, and ROC-AUC.
- Trained a Power BI churn dashboard with risk segmentation and cohort filters to support targeted retention strategies.

Education

2024–	Dhirubhai Ambani University , Gandhinagar, Gujarat	M.Sc. in Information Technology
2026	CPI: 7.6	BCA
2021–	GLS University , Ahmedabad, Gujarat	
2024	CPI: 9.0, Classification: Distinction	
2021	Kendriya Vidyalaya Sabarmati, CBSE	12th Grade
	Percentage: 87.4%	
2019	Kendriya Vidyalaya Sabarmati, CBSE	10th Grade
	Percentage: 69.7%	

Technical Skills

Languages & Querying: Python, SQL, Java, JavaScript, C++

Data Analysis & EDA: Pandas, NumPy, Scikit-Learn, SciPy, Statsmodels

Visualization & BI: Power BI, Matplotlib, Seaborn, Plotly, Excel, Google Sheets

Databases: MySQL, MongoDB, Firebase, PostgreSQL

CRM & Product Tools: Zoho CRM, Zoho SalesIQ, Zoho PageSense, Zoho Creator, Jira

Dev & Workflow Tools: Git, GitHub, VS Code, Postman, React.js, Node.js, Express.js

Product & Data Analysis: A/B Testing, Data Modeling, Experiment Analysis, Business Metrics Tracking

Certifications

- Awarded **2nd Place** – Brain Degger Coding Competition for building a functional banking website under timed programming conditions.
- Core Team Member – Operations & Management, Synapse (DA-IICT): Coordinated events with **10,000+ participants** and managed **30+ volunteers** across departments.
